

PRESS RELEASE

Leverage Launches New Video Surveillance Website

Woodinville, Wash., Oct. 2 - Leverage Information Systems today announced it has launched a new section on its website dedicated to the company's growing IP communications network video surveillance practice.

Available at www.video.leverageis.com, the site is designed for public officials, security professionals, business leaders, and IT professionals who are considering installing video surveillance systems.

Featured areas of the site include:

- **Solutions:** This area features descriptions of video surveillance solutions including deterring crime and terrorism, preventing graffiti, and managing vehicle traffic and pedestrian congestion. It also includes information on how video surveillance serves as a "force multiplier" to expand police capabilities.
- **Capabilities:** Leverage's full range of capabilities is described here including systems integration, turnkey solutions, analytics, and video system security.
- **Case Studies:** Learn how other government officials and business leaders are using intelligent video surveillance systems to overcome technical challenges and meet their strategic goals.
- **Important Updates:** Featured content on timely matters and informative articles such as how to select a qualified video surveillance systems integrator.

"Leverage is an experienced IP communications networking organization that has the engineering expertise and strategic understanding of video surveillance," said Doug Chesler, president and CEO. "This new section of our Website provides government officials, security professionals and others with the information they need to design, deploy and maintain an IP network-based video surveillance system."

Look for additional enhancements to the video surveillance section of our Website in the near future.
